Questions for ECAB: online payments

Servly AG · St. Mary's, Antigua and Barbuda · servlyag5@gmail.com · servlyag.com · Prepared 2 November 2026

About Servly AG. A marketplace app and website where local businesses in Antigua and Barbuda list their services and customers find them. Customers use it free. Businesses pay Servly a **monthly subscription**:

Plan	Price per month
Starter	50 XCD
Growth	100 XCD
Business	170 XCD
Bookings upgrade (optional, Starter and Growth)	+25 XCD

Payments are taken on the website (not inside the phone apps). Launch: 15 December 2026 or 7 January 2027.

Bring with you

☐ Business registration certificate (Intellectual Property office)
☐ Inland Revenue registration / ABST number
☐ Photo ID and proof of address
☐ Website address: servlyag.com (with Terms, Privacy and Refund pages)
☐ A rough guess of payments per month in the first year: _____ merchants × about _____ XCD

1. Getting set up

1. **Can a newly registered Antigua and Barbuda business get an online (e-commerce) merchant account with ECAB?**
   Servly takes card payments on its website, servlyag.com.

2. **What documents do you need from me?**
   e.g. business registration certificate, Inland Revenue / ABST number, ID, proof of address, website, Terms and Refund Policy.

3. **Do I need an ECAB business bank account first?**

4. **How long does setup take, from application to taking the first payment?**
   We plan to launch on 15 December 2026 or 7 January 2027.

5. **Will you review the website before approving it? What must be shown on it?**
   Our Terms, Privacy Policy and Refund Policy are already on the website.

2. Taking payments online

1. **Do you provide a secure payment page I can send customers to from my website and my phone app?**
   We never want to see or store card numbers ourselves.

2. **Which cards can customers use?**
   Visa, Mastercard, local debit cards, American Express?

3. **Can I charge in Eastern Caribbean dollars (XCD)?**

4. **Can businesses in other Caribbean countries pay too, later on?**
   We plan to grow beyond Antigua and Barbuda.

3. Monthly subscriptions (most important)

1. **Can the customer's card be saved securely and charged automatically every month?**
   Our merchants pay a monthly plan: 50, 100 or 170 XCD, plus 25 XCD for an optional upgrade. Ask: "recurring billing" or "card tokenisation".

2. **How does a customer cancel, and can I stop a subscription from my side?**

3. **What happens when a monthly payment fails?**
   Do you retry? Do you tell us?

4. **Can the amount change, e.g. a 50% discount for the first 2 months, or a merchant changing plan?**
   We have a launch code: 50% off the plan for the first 2 months.

4. Connecting to the Servly system

1. **Can your system tell our server automatically when a payment goes through?**
   Ask for a "webhook" or "payment notification / callback URL". This lets the app switch on a merchant's plan by itself.

2. **What details come with that message?**
   We need: amount, currency, payment reference, and our own merchant ID and plan, which we pass when sending the customer to pay.

3. **Is there a test (sandbox) mode, and technical documents for my developer?**
   Please ask for the developer guide / API documents to take away.

4. **How do you prove a notification really came from ECAB?**
   Ask about a "signature" or "secret key".

5. Costs

1. **Setup fee, monthly fee and any yearly fee?**

2. **Fee per payment: percentage and/or fixed amount? Is it the same for local and foreign cards?**

3. **Fees for refunds and chargebacks (disputed payments)?**

4. **Minimum monthly amount, contract length, and cost to leave?**

5. **Do I need to hold a deposit or reserve?**

6. Getting the money

1. **How many days until payments reach my account?**

2. **Can I download reports of every payment for my accounts and Inland Revenue?**

7. Refunds and disputes

1. **How do I refund a payment (full or part)?**
   Our policy: billing mistakes reported within 30 days are refunded.

2. **How do disputed payments (chargebacks) work, and how long do I have to respond?**

Who I spoke to, contact details, and next steps
